Please wait in the lobby until the therapist comes for your child. This will avoid the possibility of children waiting alone without the therapist knowing they are here. We ask that any children in the waiting area be under constant supervision from parents/guardians.

We also request that parents/guardians stay at our facility for the duration of the therapy appointments. Schedule permitting, PMC welcomes siblings to play in our gym during treatment sessions with direct parent supervision. Permission must be granted from the front office treating therapist.
